Duration	11 mins 17 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Correct

Mark 1.00 out of 1.00

What is the first step in binary search?

a. Compare the target element with the first element in the list
b. Sort the list
c. Divide the list into two equal parts
d. Compare the target element with the middle element in the list ✓

Question **2**

Correct

Mark 1.00 out of 1.00

In linear search, how is the element searched?

a. By sorting the list first
b. By dividing the list into halves
c. By using a hash function
d. By comparing each element in the list sequentially ✓

Question **3**

Correct

Mark 1.00 out of 1.00

What type of search would be most appropriate for finding an element in a list that is frequently updated?

a. Hash search
b. Binary search
c. Linear search ✓
d. Interpolation search

Question **4**

Correct

Mark 1.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 99; what are the mid values(corresponding array elements) in the first and second levels of recursion?

a. 89 and 94
b. 90 and 94
c. 90 and 99 ✓
d. 89 and 99

Question **5**

Correct

Mark 1.00 out of 1.00

In which type of search is the list divided into smaller sublists during the search process?

a. Linear search
b. Sequential search
c. Binary search ✓
d. Hash search

Question **6**

Correct

Mark 1.00 out of 1.00

What is the advantage of binary search over linear search?

a. Binary search can find multiple instances of the target element
b. Binary search works on unsorted lists
c. Binary search does not require dividing the list
d. Binary search has a lower time complexity on large, sorted lists ✓

Question **7**

Correct

Mark 1.00 out of 1.00

What is the key characteristic of binary search?

a. It can be applied only if the list is sorted ✓
b. It works on unsorted lists
c. It always starts from the beginning of the list
d. It compares elements sequentially

Question **8**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

a. Both (1) & (3)

b. Linear search ✓

c. Binary search

d. Hash search

Question **9**

Correct

Mark 1.00 out of 1.00

During a binary search, what happens if the target element matches the middle element?

a. The search continues in the right sublist

b. The list is sorted

c. The search continues in the left sublist

d. The search ends successfully ✓

Question **10**

Incorrect

Mark 0.00 out of 1.00

Which of the following is not the required condition for a binary search algorithm?

a. There should be direct access to the middle element in any sublist

b. Number values should only be present ✗

Number values should only be present

c. There must be a mechanism to delete and/or insert elements in the list

d. The list must be sorted

Question **11**

Correct

Mark 1.00 out of 1.00

Which of the following statements about linear search is true?

a. Linear search divides the list into halves.

b. Linear search is more efficient than binary search on large lists.

c. Linear search requires the list to be sorted.

d. Linear search can be applied to both sorted and unsorted lists. ✓

Question **12**

Correct

Mark 1.00 out of 1.00

During a linear search, what is the maximum number of comparisons needed to find an element in a list of size n?

a. n-1
b. log n
c. n/2
d. n ✓

Question **13**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

a. Sorting the list before searching
b. Dividing the list in half repeatedly
c. Checking each element sequentially ✓
d. Skipping every second element

Question **14**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

a. Quick search
b. Merge search
c. Linear search ✓
d. Bubble search

Question **15**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Deleting elements from a list
b. Inserting elements into a list
c. Determining whether an element is present in a list ✓
d. Sorting elements in a list
